This technical drawing is an exploded perspective view of a mechanical assembly. The main components are shown in a disassembled state to illustrate their relative positions and assembly relationships. Key parts include a housing (10) with a flange (10a) and a central opening (11c). A central shaft or pin (11) is shown passing through the housing. A gear or cam (14) is positioned below the housing, with its teeth (14a) and a central hub (14b) visible. A spring (18) is shown coiled around the central shaft. Other components include a bracket (77), a pin (76), and various fasteners (32, 32a). The drawing uses standard engineering conventions, including dashed lines to indicate hidden internal features and leader lines to identify specific parts.
